PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student at Amity University, Rajasthan (CGPA: 8.7), focused on full-stack development (MERN) and AI-driven automation. Completed internships in QA Automation, AI/ML, and Cybersecurity, with hands-on work building MCP-based tooling, Claude/Copilot integrations, agentic AI workflows, and Playwright test automation. Consistently practices data structures and algorithms, having solved 50+ problems on LeetCode. Eager to contribute to real-world software projects and grow through meaningful software development opportunities.

INTERSHIPS / TRAINING

QA Automation Intern – Advaiya Solutions Pvt. Ltd. (On-Site)

June – July 2026

- Built an MCP (Model Context Protocol) connector integrating Claude to auto-generate test cases directly from Functional Requirement Specification Documents (FRSDs), reducing manual test-case creation effort by 60%.
- Automated export of generated test cases into structured Excel sheets and synced them to Azure DevOps for centralized test management and traceability.
- Extended the pipeline to auto-generate Playwright automation scripts from the created test cases, bridging test design and automated execution.
- Customized Microsoft Copilot AI to align with organizational SOPs, values, and workflows.
- Supported manual testing activities across multiple internal applications, including test plan creation and module-based testing.

Cisco Virtual Internship Program 2025 – Cybersecurity Intern (Virtual)

June – Aug 2025

- Certified Junior Cybersecurity Analyst by Cisco NetAcad.
- Learned cybersecurity fundamentals, network security, and threat analysis.
- Gained knowledge of firewalls, attacks, encryption, and security principles.

Edunet Foundation with Shell – AI & ML Intern (Virtual)

June 2025

- Studied machine learning concepts and Python-based implementation.
- Worked on supervised learning, regression, and classification models.
- Hands-on experience with datasets, model training, and evaluation.

PROJECTS

MCP-Based Test Case Automation Pipeline

June – July 2026

Internship Project

- Built an MCP connector integrating Claude to automatically generate test cases from FRSDs, reducing manual test-case creation effort by 60%.
- Automated export of generated test cases into structured Excel sheets and synced them to Azure DevOps for test management and traceability.
- Auto-generated Playwright automation scripts from the created test cases, streamlining the transition from manual test design to automated execution.
- Tech stack: MCP, Claude API, Excel, Azure DevOps REST API, Playwright.

Automobile Sales & Service Booking Platform | MERN Stack + AI

Ongoing

Built for family-run business

- Developing a full-stack web platform using MongoDB, Express.js, React, and Node.js for an automobile business, enabling product sales and online service booking for customers.
- Integrating an AI-based car scratch/damage detection feature to help assess vehicle condition and improve service transparency.
- Building the platform for real-world deployment and use by an active family business, covering both the customer-facing storefront and service management.
- Tech stack: MongoDB, Express.js, React, Node.js, AI/ML-based damage detection model.

Personal Project

- Built an agentic AI study-notes generator that converts a user's topic or uploaded lecture material (PDFs/PPTs) into structured, reliable, interview-oriented study notes.
- Designed a stateful multi-agent workflow using LangGraph, with dedicated agents for topic clarification, research, note structuring, and self-checking/revision — rather than a single-prompt LLM wrapper.
- Implemented a self-check agent that reviews generated notes for missing information and inconsistencies and triggers limited revisions to improve output quality.
- Delivered structured outputs including definitions, key concepts, worked examples, interview questions, a study roadmap, and a practice checklist.
- Tech stack: React 19, Vite, Framer Motion (frontend); Python, FastAPI, Uvicorn (backend); LangGraph + Groq (AI/agents); MongoDB Atlas (database); PyPDF, python-pptx (document processing); Pydantic (validation).

EDUCATION

B.Tech — Computer Science (Major) 2023 – 2027

Amity University, Rajasthan · CGPA: 8.7 (pursuing)

XII CBSE 2023

St. Mary's Convent Sr. Sec. School, Udaipur – 84%

X CBSE 2021

St. Mary's Convent Sr. Sec. School, Udaipur – 92%

SKILLS

- Frontend: React.js, React 19, HTML5, CSS3
- Backend: Node.js, Express.js, FastAPI, REST APIs
- Languages: JavaScript (ES6+), TypeScript, Python
- AI & Automation: MCP (Model Context Protocol), Claude API, LangGraph, Agentic AI Workflows, Microsoft Copilot Integration
- Databases: PostgreSQL, MongoDB
- Cloud & DevOps: Basic AWS knowledge, Azure DevOps
- Tools: Git & GitHub, Postman, Playwright
- Core Strengths: Problem-solving, Teamwork, Adaptability
